Subject: Docket No E-00000XX-13-0214, Please Oppose Rollbacks and Revisions to the Energy Efficiency Standard

Dear Chairman Stump and Commissioners:

I'm very concerned with the proposal to eliminate Arizona's energy efficiency standards. I'm asking you to leave the standards intact.

Arizona's Electric Energy Efficiency Standard is recognized as one of the stronger and more effective standards in the country. Partially because of these standards and the desire to improve the energy efficiency of our home we:

replaced all of our single glazed windows with energy efficient double glazed windows,

replaced our old heating and air conditioning system with a much more energy efficient system,

sealed the ducts within the house.

I urge you to continue to support energy efficiency programs through the Energy Efficiency Standard. This program has helped residents throughout Arizona reduce their electricity bills, save money, and make our homes more comfortable.

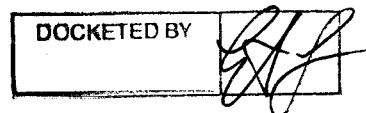

Thank you for your consideration.

Peter Bengtson
